--> Comment Text :  
I strongly feel that we cannot have nuclear wastes transported across state lines for storage in Yucca Mountain. There is no way to ensure safe transport, particularly in light of our railway and highways systems - not to mention our country's vulnerability to attack.

Nuclear wastes must be contained at their site of origin, where storage facilities already exist. More research should be focused on how to use and reuse those wastes to completely exhaust their radioactivity for a more harmless end product.
